Does income = expenses = final figure? Why is this account not automatically closing?
If you scroll further down on the accounts page, you can look at this subactivity
It has been failing the auto disabling for over a year-why?
To determine why an account is not closing-run a detail listing (lite)-for this FY and only include the activity/subactivity combination in your parameters.
There are charges to this activity/subactivity combination that are posted to other funds. These charges need to be removed in order to close this account.
