Dear Alumni and Friends of Harvard School of Dental Medicine (HSDM),

As this magazine reaches your door, spring is finally settling into New England and DMD students are beginning their rotations after completing their second year at Harvard Medical School (HMS). The DMD Class of 2015 and advanced graduate education Class of 2015 are completing their final graduation requirements and preparing for the May 28th annual commencement.

HSDM has just finished hosting our annual Donors' Appreciation Dinner, which featured Tony Wagner, MAT71, EdD92. He spoke about creating innovators who will change the world. Each year, we host our most dedicated supporters for a relaxing evening of music, conversation, food, drink and a thought-provoking presentation.

The *Harvard Dental Bulletin* has undergone a revision based on the communications vision of our new associate dean, Nancy L. Jones, as well as input from staff, faculty and students. In this issue, you will find a feature article on our new Initiative to Integrate Oral Health and Primary Care as well as our special Campaign Catch-Up. We have reorganized the Harvard Dental Bites section into three areas—Alumni News, HSDM Awards at Specialty Meetings and HSDM News. By moving Alumni News to the front of this section, we want to convey how important our alumni are to the School. We are also providing a new Table of Contents and new Faculty Spotlight page where we will feature a different faculty member in each issue. In future issues, we will include more in-depth stories on special topics, an Alumni Spotlight page, and book reviews as many more of our alumni have become distinguished authors.

The end of May is fast approaching. On May 26th, we will hold our annual awards ceremonies that honor exceptional students and faculty members. After commencement, we will host our annual alumni day on May 29th and begin the day with the Harvard Dental Alumni Association business meeting. We will then continue the conversation on innovators begun by Dr. Wagner by discussing innovations in dentistry that are underway

by our students, alumni and faculty. Following my annual State of the School address and lunch with HMS, we will gather to remember and celebrate the life of Gerald (Gerry) Shklar, AM71, the Charles A. Brackett Professor of Oral Pathology emeritus, who passed away in February.

As always, HSDM is deeply grateful for the many contributions of the alumni and friends who are committed to growing and strengthening the School. This year has also seen a significant milestone achieved as our class captains have garnered their classmates to achieve solid participation toward class giving. We are grateful for their hard work. Every contribution through June 30, 2018 will count toward *It Begins with Me—The Campaign for Harvard School of Dental Medicine*. We have already seen new fellowships and scholarships created by so many of you.

Thank you again,

R. Bruce Donoff, DMD67, MD73

HSDM Launches an Initiative to Integrate Oral Health and Primary Care after Successful Leadership Forum

The Honorable Louis Sullivan, former U.S. Secretary of Health and Human Services under President George H.W. Bush, shared historical perspectives on changes in oral health as society becomes more diverse and people are living longer.

In January 2015, HSDM announced a major new Initiative to Integrate Oral Health and Primary Care. This Initiative was developed after a very successful Leadership Forum in October 2014. Already, eight well-known companies—Colgate Palmolive; Henry Schein, Inc.; Johnson and Johnson Consumer Companies, Inc.; Life and Specialty Ventures; United Concordia Dental Insurance; Kaiser Foundation Health Plan of the Northwest; Aetna; and United Healthcare are providing leadership on the Initiative’s Advisory Board. The Board will provide informed guidance on the Initiative’s direction and serve as a vital ally to the HSDM community on issues related to oral health and primary care. The April 2015 issue of Inside Dentistry includes a cover story on this growing movement to integrate oral health and primary care as well as a Viewpoint article from Dean Bruce Donoff. The Viewpoint article is reprinted here with permission. To read both articles online, please go to www.insidedentistry.net.

The Harvard School of Dental Medicine was 147 years old in July 2014. It was the first dental school in America associated with its university and medical school. The philosophy that dentistry is a branch of medicine directs our education and practice. In fact, our mission is to develop and foster a community of global leaders dedicated to improving human health by integrating dentistry and medicine at the forefront of education, research, and patient care. Our vision is to transform dentistry by removing the distinction between oral and systemic health.

Consistent with this mission and vision, the Harvard School of Dental Medicine hosted its sixth Leadership Forum in October 2014 with the theme: “Put Your Money Where Your Mouth is: The Economic Imperative of Oral Health.” the forum brought together leaders outside the dental community, including insurers, business leaders, economists, and public health experts, to explore the costly impact of poor oral health care on overall health especially chronic disease.

The goals for greater integration of dental and medical education and practice recommended by the 1995 Institute of Medicine (IOM) report “Dental Education at the Crossroads”¹ and the 2001 Surgeon General’s Report on Oral Health² remain elusive. New options for prevention, diagnosis, and therapy based upon advances in oral biology and craniofacial research are poised to produce new and better options for patient care. Reuniting the mouth with the body rests upon associative, not causal, scientific data, and this Forum highlighted evidence now showing that coordinating and integrating oral health with medical coverage and care lowers costs, especially for those with chronic diseases such as diabetes and cardiovascular disease.³ Presenters from Blue Cross Blue Shield of Massachusetts, Cigna, Kaiser Northwest, Aetna, United Concordia, and United Healthcare presented data demonstrating that investment in oral health improves general health and reduces medical costs. Public health economists, healthcare economists, and business thinkers commented upon all the presentations.

Fifteen years of research, reports, and recommendations addressing the dental medical divide has delivered little serious action to address our nation’s oral health deficiencies. Oral health remains a stepchild. Maybe it is the fact that oral diseases other than oral cancer do not usually result in mortality, except in extreme cases like that of Deamonte Driver. Yet morbidity is real for thousands of people, ranging from children who miss days of school because of pain, to adults who seek help in emergency departments staffed by caring physicians and nurses who really do not know the area. Oral health does matter, and the Forum presented a major shift by emphasizing the

economic imperative of good oral health to the strong but non-causal data on the relationship between oral disease and systemic disease. Medicare never included dentistry and now we are faced with an evergrowing elderly population with more chronic disease. The imperative suggests that inclusion of oral health in primary care efforts is very worthwhile. The insurance data presented at the Forum is augmented by examples like a pilot project at the Marshfield Clinic. Inclusion of oral health in a quality metrics demonstration project linking periodontal exams in diabetic patients showed more than a \$50 million saving over 5 years and using tools based upon a shared electronic health record, many patients had diabetes discovered per week.⁴

Integrating primary care and oral health makes sense for a number of reasons. Integration can raise the patients' awareness of the importance of oral health, and integrated practice arrangements have a far better chance of identifying disease precursors and underlying conditions in keeping with a patient-centered model of care. In addition, integration can bring improvement of chronic disease management and prevention, address significant oral health care access issues, facilitate the use of interdisciplinary methods to overcome patient specific barriers to accessing services, and provide significant cost savings to the health care system by controlling for and reducing risk factors common to dental disease and various chronic disease such as diabetes.⁵

Addressing the integration of oral health and primary care needs to address important policy issues. A recent paper on integrating oral health and general healthcare highlights these and other issues.¹ If integration is to be a reality, first all health insurance policies should provide coverage for dental care services including Medicare, Medicaid, and all private insurance, regardless of age. Second, we must integrate general medical and dental care into both practice and workforce education. Lastly, a major issue affecting the implementation of most models integrating oral health and primary care is the current state of the workforce. Generally in oral health there is a lack of provider capacity, training, and experience in operating cross-disciplinary or in an integrated setting.

Likewise, primary care providers are generally untrained in oral health procedures and practices. There is significant need to develop the primary care and dental workforce by providing future and existing providers with the skills needed for integration to succeed. Similarly there is a huge need for dental education to finally listen to and practice the recommendations of the 1995 IOM Report. Return dental education to understanding the whole patient, so that dentistry takes its rightful place along with ophthalmology and dermatology as a branch of medicine. The advent of oral health auxiliaries that might relieve the dentist of routine procedures and permit them to practice at the top of their licenses and abilities and provide care to more patients is another part of this puzzle.

So to borrow someone else's approach, I have a dream. A dream that one day patients will come to see their primary care provider and dentists together in an interprofessional setting. Dentists and/or physicians working with nurses, hygienists, and assistants would examine patients, take interim histories, and manage chronic disease. Dental and medical students would be part of these teams to foster their interprofessional education and training. Teams will work to improve the care of our patients.

The goal is care, not insurance. The goal is culture change, not regulation. We now know that incorporating oral health with medical coverage lowers costs and improves health. Can the economic implications of this evidence lead to change? This is a national challenge seeking effective leadership. Is the dental profession up to the task in 2015, 20 years after the IOM report and 15 years after the Surgeon General's Report?

The Campaign for Harvard School of Dental Medicine

Spring 2015

HSDM Receives Gift from Straumann USA, LLC

HSDM has received a \$250,000 gift from Straumann USA, LLC, a wholly-owned subsidiary of Straumann Holding AG, headquartered in Basel, Switzerland. The donation is restricted and will support residents studying and conducting work within HSDM's Department of Restorative Dentistry and Biomaterials Sciences. Straumann is one of HSDM's major corporate donors and has provided an accumulated amount of over \$1 million in gifts to the School.

"On behalf of HSDM, I want to express how deeply grateful we are to Straumann USA to be honored with this gift to further support our growing advanced graduate education program. The Straumann gift represents a major step forward for more corporate and foundation support coming to HSDM," stated Nancy L. Jones, associate dean of development and alumni relations.

"The Straumann gift, in the form of endowed funds, may be used for direct and indirect expenses of advanced graduate education residents in dental medicine as well as provide research support", stated Dean Bruce Donoff.

"At Straumann, education is fundamental to the success of our clinicians and to the well-being of their patients," said Arjan Haverhals, Vice President of Customer Marketing and Education. "It is our mission to be the benchmark in our industry for professional training and continuing development worldwide. Through our support of schools and universities, we have the opportunity to contribute greatly to the advancement of research and education based on collaboration with a network of world renowned researchers, clinicians, academics, and students—representing the future of dentistry." German Gallucci, associate professor and interim chair of restorative dentistry and biomaterials sciences, continues to build partnerships to help secure more funding for student scholarships.

German Gallucci, associate professor and interim chair of restorative dentistry and biomaterials sciences, delivers a keynote presentation on digital implant dentistry at the 2014 American Academy of Implant Dentistry annual meeting, in Orlando, Florida.

On October 3, 2014, HSDM held a faculty and staff launch for *It Begins with Me – The Campaign for Harvard School of Dental Medicine*. The event was also an open house for the redesigned Offices of Development and Alumni Relations and Human Resources.

You Can Improve Human Health Worldwide

Contribute to the \$8 Million HSDM Campaign

The Campaign for the Harvard School of Dental Medicine is focusing on two primary priorities: **Financial Assistance** and **Global and Community Oral Health Programs**. Both will provide opportunities for students and operating-budget relief.

Financial Assistance

Goal: \$6 million

In order to ensure that HSDM attracts the most outstanding students, regardless of their financial situation—including individuals from underrepresented minority groups or disadvantaged backgrounds—the School must significantly increase student scholarship funding. HSDM must also ensure that when its students leave the School, they are not heavily burdened by debt. You can participate in several ways:

DMD Scholarships

Financial Assistance for the Best and Brightest

- Contribute to the existing HSDM Scholarship Endowment Fund
- Contribute to the existing HSDM General Scholarship Fund
- Establish a named, endowed DMD scholarship

Specialty Fellowships

Deepening Areas of Study

- Contribute to existing current-use fellowships
- Establish a named, endowed fellowship

Dean's Scholars Fund

Fostering Careers in Academia

- Establish an endowment for the Dean's Scholars program, which provides protected time for outstanding individuals to develop and refine the skills necessary for a career in academia and research.

Global and Community Oral Health Programs

Goal: \$2 million

- Establish an endowment to support student externships and faculty initiatives in sustainable public oral health programs, both locally and in countries such as Haiti and Rwanda.
- Contribute to existing global and community oral health funds

Additional Selected Ways You Can Build HSDM Capacity

- Establish a named, endowed professorship
- Name a laboratory
- Name a space in the Research and Education Building
- Contribute to the Chester W. Douglass Fellowship
- Establish the George Franklin Grant Scholarship

For more information, please contact:

Wanda Mock at wanda_mock@hsdm.harvard.edu, 617-432-5356.

Above: Deah Shaddy Barakat, Yusor Mohammad Abu-Salha (Deah's wife), and Razan Mohammad Abu-Salha (Yusor's sister and a sophomore at North Carolina State University) were remembered by the HSDM community.

Below: Hend Alqaderi, DMSc2016 (dental public health) addresses the standing-room audience during the remembrance event.

Remembering Deah, Yusor and Razan

On Monday, March 23, 2015, a standing-room only crowd gathered in the HSDM auditorium to remember Deah Shaddy Barakat, Yusor Mohammad Abu-Salha and Razan Mohammad Abu-Salha. These three dynamic young people were killed at a residential complex of the University of North Carolina at Chapel Hill on February 10, 2015. This event shocked the world. Deah (a second-year dental student at the University) served communities around the world and upheld the integrity of the dental profession. Deah and Yusor had just married. The loss of these three reminds us of the critical task of cultivating relationships in a pluralistic society. "We are here today to celebrate and remember Deah, his life, and his family. Deah was an excellent representative of humanity in the Muslim community in a time that Islamic identity is suffering because of extremist acts and media influence," stated

Hend Alqaderi, DMSc2016 (dental public health). The program included reflections from Farris Barakat, Deah's brother; Peggy Timothé, MPH02, PD05 (dental public health), instructor in the Department of Restorative

Na'el Cajee, DMD14, MMSc17, addresses the audience with the opening thought, "Our profession at its heart is a cause to heal."

Dentistry and Biomaterials Sciences; Na'el Cajee, DMD14, MMSc17; Brian J. Swann, MPH08, instructor in oral health policy and epidemiology; Mary Tavares, director of the advanced graduate education program in dental public health; and Dean Bruce Donoff, DMD67, MD73. Dr. Tavares read a very moving response from Jane A. Weintraub, MPH80, PD82 (dental administration), dean of the University of North Carolina at Chapel Hill School of Dentistry. This event was sponsored by the HSDM Office of Diversity and Inclusion. The full video of the remembrance service may be found on the HSDM YouTube channel.

Class of 2015 Celebrates Match Day

On January 29, 2015, the DMD Class of 2015 celebrated Match Day. The members of the DMD Class of 2015 spent months eagerly awaiting news of where they would pursue their postgraduate specialty training. Faculty, staff, and fellow students came together to congratulate and recognize the graduating class for their achievements and future endeavors at a special Match Day tea time celebration. Dean Bruce Donoff, DMD67, MD73, addressed the students and expressed his pride in their accomplishments.

HSDM Holds First Oral Health Day

Since good oral health plays a vital role in ensuring good overall health, HSDM held its first Oral Health Day at Harvard Medical School (HMS) on November 10, 2014 for second-year medical and dental students enrolled in the course, Patient-Doctor II, under Dr. Fidencio Saldana. HSDM faculty members presented lectures on basic oral anatomy, oral health's relationship to systemic health as well as the social aspects of oral health and dental treatment. Following the lectures, HSDM faculty supervised small group exercises, which included a tutorial case study and hands-on oral examinations by the medical and dental students. Based on the positive student feedback, the Oral Health Day may become a permanent part of medical education at HMS.

"HSDM provides a unique educational model because our predoctoral students (DMD) study clinical medicine with HMS medical students and then pursue additional years of study at HSDM and affiliated sites. Now, we see elements of this educational model amongst HMS medical students who received oral health training through this event. The entire experience was so well-received," stated Dr. Sang Park, MMSc01, PD01 (prosthodontics), assistant dean for dental education and director, predoctoral curriculum.

Members of the DMD Class of 2015 pose on Match Day. Listed in alphabetical order: Anitha Abdul Rahiman; Naeem Ali; Eshwar Arasu; Demyana Ramez Azer; Earl Jordan Blanche; Eliezer Brecher; Sydnee Erin Chavis; Sara Elizabeth Chen; Elizabeth Joan Eve; Samantha Ricki Floam; Zachary Leo Freer; Peter Waitak Fung; Sean Michael Geary; Grace Ellen Gianneschi; Christopher Patrick Goodell; Mehedia Haque; Gino Inverso; Timothy C. Jaeger; Hope Lindsey Johnson; Michael Thomas Jungwirth; Shikha Kanotra; Arthur Joon Kim; Soo Yeon Kwon; Zev Lazarus; Ningkun Li; Sheng Chuan Lin; Nicole Chinwe Oparaeke; Armando Pardo; Sohyun Park; Christine Deek Rayan; Jeffrey Brian Reardon; Edward H. Schaefer IV; Neha Patel Shah; Michelle Davida Shapiro; Stephanie Rachel Slate; Ji Hyun Tahk; Ariel Yongsweng Tsao; and Hyun J. Yoon.

Lisa Simon, DMD14 (PD 2015, general practice residency), gives a lecture to medical and dental students.

Give Kids a Smile 2015

Above: Andrew Carranco, DMD 2017, greets several smiling children who benefited from this year's event.

On Saturday, February 7, 2015, HSDM held its annual Give Kids a Smile event, a student-led effort that provides free dental care and education to children ages 1-17. Nearly 50 children, many of whom come from local communities surrounding the Longwood Medical Area, received free cleanings, oral exams, and fluoride varnishes from third-year and fourth-year DMD students. With the assistance of orthodontic residents, several children received orthodontic consultations. First-year and second-year DMD students also provided education to children and their families on the importance of oral hygiene and healthy eating habits. The event was led by student-organizers George Chen, DMD 2017; Joseph DePalo, DMD 2017; and, Chloe Wong, DMD 2018. The event included participation by several HSDM faculty and staff, most notably Myra Garza, associate director of clinical operations, Harvard

Below: Elena Cho, DMD 2016, and Luke Han, DMD 2018, provided oral health care to this family and several others at the event.

Dental Center, and Zameera Fida, DMD08, PD10 (pediatric dentistry), director of the predoctoral program in pediatric dentistry and a clinical instructor at HSDM. Give Kids a Smile is a national program that was started in 2003 by the American Dental Association. Each year, more than 300,000 children benefit from more than 1,500 events nationwide.

Longer Service Luncheon Shines Spotlight on HSDM's Employees

In recognition of their hard work and enduring commitment to HSDM and Harvard University, all employees are recognized for their significant career commitment and continuous service. At the beginning of each year, HSDM's Department of Human Resources hosts a beautiful luncheon in the lobby of the Research and Education Building and awards are given out by Dean Bruce Donoff. Those employees recognized on February 27, 2015 included:

Left:
Eleni Kayas.
Middle:
Nkwanz Sabiti.
Below:
Duane J. Koedyker.

Name	Department	Years of Service
Amalia S. Sgourakes	Administration and Finance	30
Eleni Kayas	Harvard Dental Center	25
Zena W. Brown	Harvard Dental Center	25
Duane J. Koedyker	Harvard Dental Center	20
Sofiya Aronovna Plotkina	Office of Research	20
Yulia Pittel	Office of Research	20
Angela M. Burke	Office of Dental Education	15
Harvey Willson	Development and Alumni Relations	15
Linda E. Ross	Developmental Biology	15
Monica N. Garrison	Oral Medicine, Infection, and Immunity	15
Nkwanz Sabiti	Restorative Dentistry and Biomaterials Sciences	15
Adrien Doherty	Office of Dental Education	10
Daniel S. Costa	Administration and Finance	10
Ileana M. Reyes	Harvard Dental Center	10
Shawn R. Berry	Oral Medicine, Infection, and Immunity	10
Yves de Jesus	Harvard Dental Center	10

HSDM on the Road

Alumni Connect at HSDM Receptions

Above: IADR reception.

Top Right: ADEA reception.

Far Right: ADEA reception.

Below: Yankee Dental Congress reception.

During the fall and winter, HSDM held receptions for alumni in several locations, including San Francisco, CA; New Orleans, LA; West Palm Beach, FL; and Boston, Mass. The largest reception was held at the HSDM-Forsyth reception at the recent IADR meeting with over 400 in attendance.

Senior Dental Leaders Program

Left: Catherine Lane, assistant dean of clinical affairs and business development, gave Senior Dental Leaders a tour of the Harvard Dental Center.

Cold weather and snow could not keep participants from Rwanda, Cambodia, Indonesia, Tanzania, Australia, Qatar, Jordan, New Zealand, England, Thailand, China, Mexico, Canada and across the U.S. from attending the ninth year of the Senior Dental Leaders Program held March 9–14, 2015 in Boston, Mass., sponsored by the Global Child Dental Fund, HSDM, and King’s College London. During the week, leaders spent time developing their leadership skills, building collaborative relationships, learning how to further oral health agendas and improving the dental health of

children in their home countries. One special highlight of the program included an update on the Rwanda Human Resources for Health project—“Building a new dental school for Rwanda.” Stanley M. Bergman, Chairman of the Board and CEO, Henry Schein, Inc., hosted a gala dinner at the Downtown Harvard Club and spoke about the importance of public-private partnerships. Professor Sonia Groisman from Brazil received the prestigious Tony Volpe Award. “The opportunity to meet so many dental leaders from every corner of the world, sharing our common experiences and contextual challenges was an exceptional one. I am greatly appreciative for the Tony Volpe award as it has enabled me to develop my strategic skills and confidence in all areas of leadership and will be essential for my future work in oral health within Brazil,” she stated.

Below: Sonia Groisman is pictured with left to right: Dr. Anthony “Tony” Volpe, Vice President, Global Oral Care, Colgate-Palmolive; Raman Bedi, Chair, Global Child Dental Fund; and Stanley M. Bergman, Chairman of the Board and CEO, Henry Schein, Inc.

Update from Rwanda Year Three

The School of Dentistry, which is located within the College of Medicine and Health Sciences at the University of Rwanda in Kigali, hosted a school oral health promotion at the Kivugiza Primary School for World Oral Health Day 2014. Muhumuza Ibra, Dean, School of Dentistry, is pictured with the school children.

HSDM continues its collaboration with the University of Maryland (UMD) and the University of Rwanda College of Medicine and Health Sciences to launch the first-ever School of Dentistry, which is located within the College of Medicine and Health Sciences at the University of Rwanda in Kigali. The project is now in year three and several HSDM faculty members have been on the ground working with newly appointed Dean Muhumuza Ibra to design the curriculum, academic organization, and infrastructure for the School of Dentistry (SoD).

Donna Hackley, an instructor in oral health policy and epidemiology; Sawsan Salih, PD13 (dental public health), an instructor in oral health policy and epidemiology; Brittany Seymour, assistant professor of oral health policy and epidemiology; and, Brian Swann, MPH08, an instructor in oral health policy and epidemiology, have been working on the ground in Kigali over the past two years with Dean Ibra and colleagues from UMD. This year, Karl Self, visiting associate professor from the University of Minnesota, who directs the only dental therapy program in the U.S., as well as Ladan Basiripour, DMD93, visiting associate professor

from Howard University and president of the Harvard Dental Alumni Association, are headed to Rwanda.

Great strides have been made. The first class of dental surgeons matriculated into the College of Medicine and Health Sciences in 2013 where, like their HSDM peers, they will spend two years with their fellow medical students prior to transitioning over to the SoD. The first class will arrive at the SoD in September of 2015. Once there, they will join their dental therapy classmates, who are already in session as the dental therapy program transferred out of the school of nursing and into the new SoD. HSDM, UMD and SoD faculty have been busy working out competencies for therapists and surgeons as well as how to combine and leverage the resources of the SoD to support the two programs.

Students from Harvard College, Harvard T.H. Chan School of Public Health and Harvard Business School are joining HSDM students in an effort to develop and implement SoD research in partnership with Rwandan faculty and students. A collaboration with Tufts University on a national study of oral health status in Rwanda will help gauge our academic programming and workforce planning. It is an exciting and rewarding project – more to come over the next four years!

A panel gives an update on the School of Dentistry during the Senior Dental Leaders Program. From left to right: Sawsan Salih, PD13 (dental public health), an instructor in oral health policy and epidemiology; Donna Hackley, an instructor in oral health policy and epidemiology; Brian Swann, MPH08, an instructor in oral health policy and epidemiology; Muhumuza Ibra, Dean, School of Dentistry, College of Medicine and Health Sciences at the University of Rwanda in Kigali; Valli Meeks, clinical associate professor, University of Maryland School of Dentistry; Brittany Seymour, assistant professor of oral health policy and epidemiology; and, Jane Barrow, AB84, MS87, assistant dean of global and community health.

Alumni News

FRANK CATALANOTTO, PD71 (pediatric dentistry), writes, “Life is good in Florida. In February 2015, I stepped down as chair of the Department of Community Dentistry and Behavioral Science at the University of Florida, but I will continue my full-time faculty appointment, focusing primarily on my grants from HRSA and other agencies. My continuing focus is on access to care and oral health care disparities. In January 2015, I started a two-year term as chair of the board of directors of Oral Health America. My wife and I have a new grandson and we feel lucky that our three children all live in Florida.”

JOHN E. DUCKWORTH, MMSc83, PD82 (periodontology), was featured in the October 2014 edition of *Annapolis* magazine’s feature on top dentists. Dr. Duckworth is a Fellow of the International College of Dentists, a past president of the Ohio Academy of Periodontists and maintains a practice, Chesapeake Periodontics in Severna Park, Maryland.

In October 2014, **RYAN DUNLOP, DMD06**, welcomed newborn twin boys, Andrew and Brendan to his family, joining a 3½ half year old sister, Audrey.

DAVID FEUER, PD73 (orthodontics), reports that he is fully retired after 39 years of practice.

LEILA JAHANGIRI, DMD97, MMSc95, PD95 (prosthodontics); SOOMIN JUNG, MMSc 2015; and EDWIN J. RILEY III, DMD73, PD75 (prosthodontics), were featured in the January 21, 2015 *New York Observer* in an article titled, “Top of the Class: Some of NYC’s Leading Professors Share Their Secrets.” Dr. Jahangiri, clinical professor and chair of the Department of Prosthodontics at New York University chairs a department of 90 faculty members and is co-author of *A Guide to Better Teaching: Skills, Advice and Evaluation for College and University Professors*.

GEORGE FRANKLIN GRANT, DMD 1870, the second African American graduate of Harvard Dental School (now Harvard School of Dental Medicine), the first African American professor at Harvard University and inventor of the modern golf tee was featured in *Dear Doctor* (www.DearDoctor.com). HSDM intends to establish an endowed scholarship in Dr. Grant’s name.

HERBERT HO-KUEN HAU, DMD77, recently sold his practice and is still very active in the Northeast Regional Board Exam.

IRA B. LAMSTER, MMSc80, PD80 (periodontology), Professor in the Department of Health Policy and Management, Mailman School of Public Health, Columbia University and Dean Emeritus, College of Dental Medicine, Columbia University has written a book titled, *Diabetes Mellitus and Oral Health: An Interprofessional Approach*. In January 2015, Dr. Lamster became the editor of the *International Dental Journal*.

DAVID MOMTAHANI, PD78 (oral pathology), was accepted as a Fellow of the American Academy of Cosmetic Surgery. He is one of the few specialists in the country who have been honored by the Academy as a full Fellow. Dr. Momtaheni, a board certified

oral and maxillofacial surgeon and an oral and maxillofacial pathologist, is a clinical professor at Columbia University School of Dental Medicine.

EDWARD R. MOPSIK, DMD67, is listed in *Washingtonian* magazine’s Top Dentists 2015. To put together this list, a ballot was mailed to every area dentist in DC, Maryland and Virginia listed online with the American Dental Association as well as other local and national dental societies. 468 of the area’s best general dentists and specialists were selected.

Edward M. Morin, DMD60, (center) is joined by **Eusebio Diaz, PD74 (orthodontics)**, and **Carlos Mendez-Villamil, PD81 (orthodontics)**, while teaching the Typodont Course (wire bending) at the University of Puerto Rico School of Dental Medicine to the orthodontic residents in San Juan in July 2014. Dr. Morin, who has retired from his private practice in Worcester, Mass., started teaching this course in 1964 at Harvard-Forsyth.

PETER NGAN, DMD81, chair of West Virginia University School of Dentistry Department of Orthodontics, has been installed as the inaugural Branson-Maddrell Endowed Professor in Orthodontics.

RENEIDA E. REYES, MPH81, PD81 (pediatric dentistry), was elected president of the American Dental Association Foundation (ADAF) Board of Directors during the ADAF board meeting in September 2014. Dr. Reyes is currently section chief – pediatric dentistry for New York Methodist Hospital, Columbia Presbyterian Network, and also maintains a private practice.

HSDM alumni at the 96th annual meeting of the American Association of Oral and Maxillofacial Surgeons (AAOMS), held in September 2014 in Honolulu, Hawaii. From left: Richard Black, AB77, DMD84, MPH84; Leon Assael, DMD75; Carol Lorente, DMD80, PD83 (oral surgery); Earl Freymiller, DMD84, MD86; Thomas Dodson, DMD84, MPH84; Michael Block, DMD79; and David Shafer, DMD86. AAOMS recognized Dr. Dodson with the William Gies Foundation Award. The meeting was dedicated to Walter Guralnick, DMD41. Photo by Richard Black.

The HSDM Class of 2008 organized a reunion event at the JW Marriott Resort in Palm Desert, California at the end of September 2014. The event was extremely successful with 25 guests attending (12 class members, 9 spouses, and 4 children). The weekend-long reunion featured multiple events as well as time for classmates to reconnect and relax with family members. A cocktail reception, a multi-disciplinary continuing education seminar featuring presenters from the class representing five different specialties, and a group dinner were among the highlights of the weekend. **BRADLEY WEINSTEIN, DMD08**, organized the continuing education seminar. The HSDM Class of 2008 has remained very close over the years and plans to expand upon this reunion in the years to come.

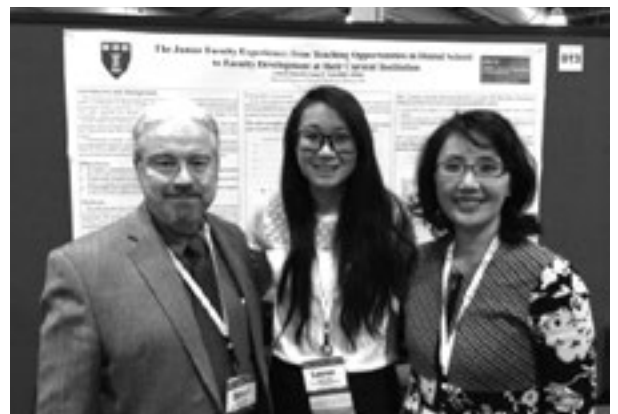

Members of the HSDM Class of 2008 and their families attended a reunion event in Palm Desert, Calif. Photo by Dan Cassarella.

HSDM Awards at Specialty Meetings

ACADEMY OF OSSEOINTEGRATION: HSDM shined brightly and received awards during the Academy of Osseointegration's 30th annual meeting in March 2015 in San Francisco, California. **JAMIE CHUNG, MMSc15 (periodontology)**, was a top 10 poster presenter. **KEVIN GUZE, DMSc10**, and **JUSTIN RAANAN, MMSc 2016 (periodontology)**, gave oral presentations. **DAVID KIM, DMSc05, PD05 (periodontology)**, was a moderator for the "Focus on South Korea" symposium.

AMERICAN DENTAL EDUCATION ASSOCIATION (ADEA): **WALTER GURALNICK, DMD41**, professor emeritus of oral and maxillofacial surgery was named a William J. Gies Awardee for Outstanding Innovation by a Dental Educator by ADEA. Dr. Guralnick received his award in March 2015 in conjunction with the 2015 ADEA Annual Session and Exhibition held in Boston, Mass. **HOSSEIN BASSIR, DMSc 2017 (periodontology)**, received the Olav Alvares Award for outstanding article by a junior scholar. **LAUREN HUM, DMD 2016**, received second place in the student poster completion for her presentation, "The Junior Faculty Experience: From Teaching Opportunities in Dental School to Faculty Development at their Current Institution."

HSDM senior tutor Samuel Coffin, PD80 (general dentistry), and Sang E. Park, MMSc01, PD01 (prosthodontics), assistant dean for dental education, congratulate Lauren Hum, DMD 2016, on her student poster completion win.

AMERICAN ACADEMY OF IMPLANT DENTISTRY (AAID):

HSDM Vice Dean and associate professor of restorative dentistry and biomaterials sciences, **JOHN DASILVA, DMD87, MPH87, PD89, PD91, SM92**, was installed as president of the AAID during its November 2014 annual meeting in Orlando, Florida. **DOMINIQUE D. ROUSSON**, instructor in restorative dentistry and biomaterials sciences, performed a surgical procedure that was broadcast live from HSDM to the AAID meeting. **GERMAN O. GALLUCCI**, associate professor and interim chair of restorative dentistry and biomaterials science, delivered a keynote presentation on digital implant dentistry. **PAUL A. SCHNITMAN, PD74**, lecturer in restorative dentistry and biomaterials sciences, discussed the reliability of guided implant placements.

AMERICAN ACADEMY OF PERIODONTOLOGY (AAP):

Several members of the HSDM community participated and received awards during the 100th annual meeting of the American Academy of Periodontology September 19-22, 2014 in San Francisco, California. **STEVEN OFFENBACHER, PD81 (periodontology)**, received the distinguished scientist award. **WILLIAM GIANNOBILE, DMSc96, PD96 (periodontology)**, received the William Gies Award. Dr. Giannobile and **KENNETH S. KORNMAN**, lecturer in oral medicine, infection and immunity, received clinical research awards. **MYRON NEVINS**, associate clinical professor of oral medicine, infection and immunity; **MARC L. NEVINS, MMSc97, PD97 (periodontology)**; **MICHAEL REDDY, DMD86, DMSc89, PD89 (periodontology)**; **SAM LYNCH, DMSc89, PD89 (periodontology)**; and Dr. Giannobile received the Earl Robinson periodontal regeneration award. **MARCELO FREIRE, DMSc 2016**, won the Balint Orban Memorial Award in Basic Science. **DAVID KIM, DMSc05 (periodontology), PD05**, associate professor of oral medicine, infection, and immunity, Dr. Marc L. Nevins and, Dr. Myron Nevins presented. An alumni reception was also held.

Sang J. Lee, MMSc10 (prosthodontics), PD12 (implant dentistry) and Junhyck Caleb Kim, MMSc13, PD13 (prosthodontics) are new Diplomats of the ACP.

AMERICAN COLLEGE OF PROSTHODONTICS (ACP):

SANG J. LEE, MMSc10 (prosthodontics), PD12 (implant dentistry), an instructor in restorative dentistry and biomaterials sciences, director of advanced graduate education, and director of advanced graduate education in prosthodontics and **JUNHYCK CALEB KIM, MMSc13, PD13 (prosthodontics)**, an instructor in restorative dentistry and biomaterials sciences and senior tutor for the Peabody Society, became Diplomats of the ACP after successfully completing their board certifications at the November 2014 annual meeting in New Orleans, La. **SOHYUN PARK, DMD 2015**, was awarded the best poster for the ACP Predoctoral Table Clinic Competition. HSDM alumni, faculty and students gathered for a reception reuniting current and former prosthodontist residents.

Joint Meeting of IADR/AADR/CADR:

CHESTER W. DOUGLASS, AM89, professor emeritus of oral health policy and epidemiology, received the H. Trendley Dean Memorial Award at IADR. Dr. Douglass was one of 17 distinguished awardees. **ALAA AHMED, DMSc 2017 (periodontology)**, received 2nd place at the AADR Student Research Group Dentsply/Caulk Competition. **JEFF WANG, DMSc 2015 (periodontology)**, was a finalist for the IADR Unilever Hatton Competition. The joint meeting of IADR/AADR/CADR was held in Boston, Mass. from March 11-14, 2015.

YANKEE DENTAL CONGRESS: First place in the graduate student poster competition at the January 2015 Yankee Dental Congress went to **MICHAEL SUNWOO, MMSc 2015**, for his research titled, "Using Triggers to Document Orthodontic Adverse Events in the Academic Setting."

Alumni had a great time at the American Academy of Periodontology alumni reception in September 2014 in San Francisco, Calif. Left: Harlan Shiau, DMSc05; Jerry Lin, DMSc04; Jacqueline Wong, DMD00, MMSc03; and David Pelham, MMSc03.

HSDM News

Professor **DONALD B. GIDDON, DMD59, PD62**, Annual Lecture in Behavioral Medicine and Dentistry was held on April 7, 2015. Bruce S. McEwen, the Alfred E. Mirsky Professor at The Rockefeller University in New York City, spoke on the topic, “The Brain on Stress: Epigenetic Mechanisms of Brain Plasticity Through the Life Course” to a capacity crowd in the auditorium.

Dr. Bruce S. McEwen.

JAMES BAKER, DMD 2017, and **TAAVISH SHARMA, DMD 2017**, were poster award winners at the 75th annual Soma Weiss Student Research Day presented by HSDM and Harvard Medical School.

ROLAND BARON, professor and chair of the Department of Oral Medicine, Infection, and Immunity, is serving as president of the American Society of Bone and Mineral Research, the world's leading scientific organization for bone health research. Dr. Baron is also professor of medicine, Harvard Medical School, Endocrine Unit—Massachusetts General Hospital.

HSDM Dean **R. BRUCE DONOFF, DMD67, MD73**, received the Shils-Meskin Award, given by the Dr. Edward B. Shils Entrepreneurial Fund, Inc., at a reception in October 2014 in Philadelphia, Pa. The award symbolizes his over 45 years of leadership in the dental profession as well as his efforts to showcase the importance of integrating oral health and primary care.

GERMAN O. GALLUCCI, associate professor and interim chair of restorative dentistry and biomaterials sciences, delivered presentations on implant dentistry at the American Academy of Implant Dentistry and the American College of Prosthodontics meetings in November 2014.

JANE JIAO, MMSc 2017 (periodontology), won first place in the Dentium Postgraduate Research Competition including \$20,000 to conduct her research project. **ALAA AHMED, DMSc 2017 (periodontology)**, and **SARA SHAH, DMSc 2018 (periodontology)**, won third place and both received \$5,000 to conduct their research projects.

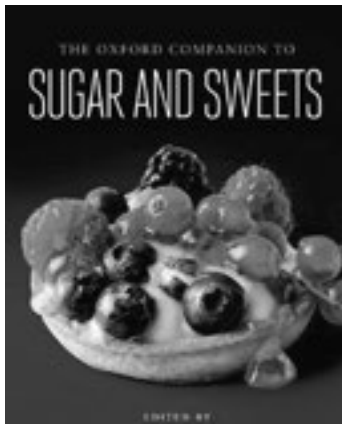

Lauren Kuhn, DMD, 2017. Photo courtesy of Stephanie Vegliante Photography.

LAUREN KUHN, DMD 2017, received \$28,600 in scholarships through the Miss America Organization which she has applied toward her HSDM education. Ms. Kuhn was crowned Miss Massachusetts in 2014. Ms. Kuhn also received a \$15,000 award as a P.E.O. Scholar.

CAMERON LEE, DMD 2016, received the Dentsply award at the 2015 HSDM research day.

SHIGEMI ISHIKAWA-NAGAI, associate professor and director of HSDM's predoctoral program in prosthodontics, will be paired with Sid Misra, an outstanding fellow from Harvard Business School's Blavatnik Fellows in Life Science Entrepreneurship Program, to promote the commercialization of her research in caries detection.

MIN KYEONG LEE, DMD10, DMSc14 (orthodontics); THOMAS B. DODSON, DMD84, MPH84; NADEEM Y. KARIMBUX, DMD91, MMSc93 (periodontology), PD93; VEERASATHPURUSH ALLAREDDY, MMSc10 (orthodontics); and, **ROMESH NALLIAH**, instructor in restorative dentistry and biomaterials sciences, received the Larry J. Peterson Prize from the Journal of Oral Surgery, Oral Medicine, Oral Pathology, Oral Radiology and Endodontology for their publication, “Effect of occurrence of infection-related never events on length of stay and hospital charges in patients undergoing radical neck dissection for head and neck cancer.” Dr. Nalliah and **LISA SIMON, DMD14 (PD 2015, general practice residency)**, received the 2014-15 Integration of Oral Health and Primary Care Curricular Innovation Award, supported through grant funding from the DentaQuest Foundation, for their project, “Improving oral health for patients of a student-run free clinic through interprofessional collaboration and education.” Dr. Simon also received the 2014 Jung Award.

TOM C. PAGONIS, assistant professor of restorative dentistry and biomaterials sciences, and **KEVIN A. GUZE**, instructor in oral medicine, infection, and immunity, wrote a section on dental caries in the recently published Oxford Companion to Sugar and Sweets.

This publication is the “most comprehensive reference work on the idea of the sweet ever published, with entries on all aspects of sweetness, including chemical, technical, social, cultural, and linguistic.”

ADAM PATENAUDE, DMD 2017, was named an American Dental Political Action Committee student director at the American Student Dental Association in October 2014.

PEGGY TIMOTHÉ, MPH02, PD05 (dental public health), is the 2015 recipient of the Michael Shannon, MD, MPH, Excellence in Mentoring Award. This Award is co-sponsored by the Harvard Medical School Office of Recruitment and Multicultural

Affairs; Massachusetts General Hospital Multicultural Affairs Office; Brigham and Women’s Hospital Office for Multicultural Faculty Careers in the Office for Faculty Development and Diversity; Children’s Hospital (Boston, Mass.) Diversity and Cultural Competency Council; and, the Beth Israel Deaconess Medical Center Office of Multicultural Affairs. Dr. Timothé is an instructor in the Department of Restorative Dentistry and Biomaterials Sciences at HSDM, a

senior tutor and the Director of the Office of Diversity Inclusion at HSDM. She completed her DDS in 1994 from New York University College of Dentistry.

NATHANIEL S. TREISTER, DMSc05, assistant professor of oral medicine, infection, and immunity, has been appointed chief of the Divisions of Oral Medicine and Dentistry at Brigham and Women’s Hospital and the Dana-Farber Cancer Institute in Boston. Dr. Treister will be responsible for oversight, direction and leadership of clinical, educational and research activities.

ALESSANDRO VILLA, instructor of oral medicine, infection, and immunity, has been appointed interim program director for postgraduate oral medicine at HSDM. Dr. Villa is also an associate surgeon at Brigham and Women’s Hospital in Boston.

HARVEY WILLSON, staff assistant 3 and development specialist at HSDM, was a nominee for the 2014 Dolores J. Brown Staff Award from the Harvard Medical School Office of Human Resources.

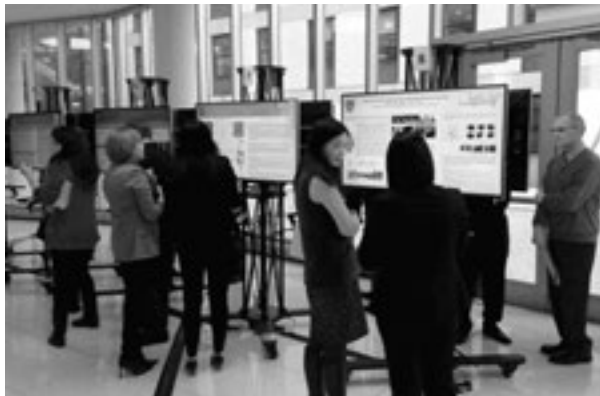

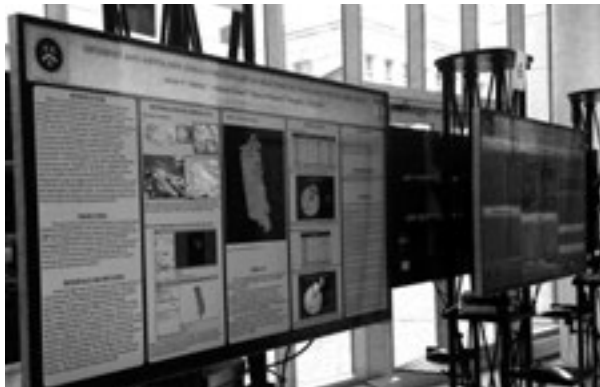

Dean Bruce Donoff and Mady Donoff celebrated 50 years of marriage in December 2014 and a special cake was presented to them.

The family of former HSDM interim dean and faculty member Joe Henry visited HSDM in April 2015. From Left: Peter Henry and Maureen Valley, DMD92, MPH92, stand under Joe Henry’s portrait with their daughters, Caroline and Claire.

Olsen, Elsbeth Kalenderian, Tanya Besschetnova, Nina Anderson, Jane Barrow, Agnes Berendsen, Francesca Gori, Beppe Intini, Porsche Jumlongras, Toshi Kawai, Sang Lee, Chia-Cheng Li, Hiroe Ohyama, Sang Park, Christine Riedy, Brittany Seymour, Mary Tavares, and Yingzi Yang.

In Gratitude

Honor Roll of Donors

Harvard School of Dental Medicine is deeply grateful to the following individuals and organizations for gifts received during the 2014 calendar year, from January 1, 2014 to December 31, 2014.

HENRY C. WARREN SOCIETY

Henry Warren made the first planned gift to HSDM in 1899 in the form of a bequest for \$10,000. The School is exceedingly grateful to those who have expressed their intention to provide for HSDM in their financial planning. To recognize this thoughtfulness, the School established the Henry C. Warren Society.

ORDER OF THE GOLDEN CROWN

This society honors those loyal donors who have contributed to HSDM for at least five consecutive fiscal years. The listing below reflects donations received during the fiscal year July 1, 2013, through June 30, 2014. Membership begins in the year of one's fifth consecutive annual gift during the fiscal year July 1 through June 30. Membership continues only with ongoing annual support.

Five Questions for Dr. Brian Swann

Working to Increase the Capacity of Healthcare on a Global Level

Who are you and what is your current role?

My name is Brian Swann. That's my name, but not necessarily who I am. I am from the United States of America, born in Tennessee, raised in California, and now residing in the Greater Boston area.

My current role, in terms of career, is that I am the Chief of Oral Health for the Cambridge Health Alliance, Oral Health Department. I'm also on the faculty of Harvard School of Dental Medicine and the faculty of Harvard Medical School, teaching, mentoring, and lecturing.

What problem are you currently working to address?

It has to do with a couple of things. One of them is to build capacity in resource-poor settings. That could be in terms of educating people, cross-training people, and coming up with methodology where you can get more bang for your buck. I'm also currently working on doing those same kinds of things on an international basis. I believe that oral health care providers are a pivotal and untapped resource of people who would be able to actually address that problem if we expanded our scope of practice.

Why is this problem important?

This problem is important because oftentimes people believe that they need to have much more material, many more people, and greater resources before they can act. I believe that you have to act with what you have to prove to yourself that you can make a difference, and you can build on that. I've used the phrase, a Native American proverb: "We're the ones we've been waiting for." We cannot wait for anyone else to do it for us. Otherwise, it may never get done.

How do you address this problem?

I think you address the problem in going back to some of the training that you get in the Harvard T.H. Chan School of Public Health. You address the problem by, first of all, deciding to take ownership of the problem in terms of making it something that you either naturally or can become passionate about, and that passion does give you a lot more energy. You have to look at collaborations. However, you have to be able to start. Getting started is oftentimes the hardest part.

A lot of people are quite intellectual, but their intellectualism often gets them nowhere. They become stagnant because they are constantly discussing the issue and never making a move. You don't know what you have and what you don't have until you actually begin. That's the way I begin to address problems: just begin and try to motivate people because I'm passionate about the things that I'm working on.

What skills help you successfully address this problem?

I think that, first of all, you have to look at your natural gifts. Your natural gifts are the things that just drive you and you just feel good about doing. There are spiritual gifts tests that you can actually take to show you if you have the spirit or the natural gift of compassion or service. Maybe you're a visionary. Maybe you're just a doer. Some people know what those gifts are; but sometimes, people don't.

With whom do you collaborate to address the problem you work on?

I collaborate with my staff. Fortunately, over the last few years, they have hired an administrative director. I have on my staff an administrative director, a clinical director, and (sort of) a regional director. We work together in solving issues, and it's nice to be a part of that team.

HSDM Alumni Day

Friday, May 29, 2015

Time	Event	Location
8:30 a.m.	Check – In and Continental Breakfast	Harvard Medical School (HMS) New Research Building
9:30 a.m. – 10:00 a.m.	Harvard Dental Alumni Association Business Meeting	HSDM Research and Education Building - Auditorium
10:15 a.m. – 11:45 a.m.	Alumni Symposium – Innovations in Dentistry	HSDM Research and Education Building - Auditorium
Noon – 12:30 p.m.	HSDM State of the School Address, Dean Donoff	HSDM Research and Education Building - Auditorium
12:30 p.m. – 2:00 p.m.	Lunch (tickets required)	HMS New Research Building
2:00 p.m. -2:30 p.m.	Tour of HSDM (optional)	HSDM Lobby
2:30 p.m. -4:00 p.m.	Remembrance Program for Dr. Gerald (Gerry) Shklar	HSDM Research and Education Building Auditorium and Lobby
