

Roses Are **#FF0000**.
 Violets Are **#0000FF**.
 Harvard is more secure thanks to you!

You are **STRONG & UNIQUE**, like a good password!

For love, follow your **HEART!**
 For security, follow the **POLICY!**

You're **Super!**

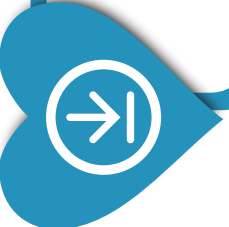

Your style is like your software, never out of date!

We Really Click!
 (just not on phishing links.)

Let's **Two Step!**

I know my **SECRETS** are safe with you!

Like a software patch...
 ... you help me keep it together!

Apply updates to fix security problems. Use auto update and restart your computer weekly. Feel free to shut down at night too. You'll still get your updates from Harvard.

security.harvard.edu

Don't click links or open files in suspicious or unexpected emails. Instead, contact the sender by phone or visit the sender's official website directly.

security.harvard.edu

Do you handle sensitive data for Harvard? If so, you can find out how to protect that data in one place!

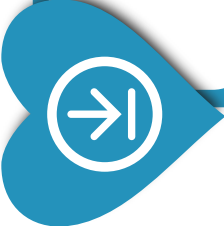

policy.security.harvard.edu

Use the Quick Reference Guide to securely handle sensitive Harvard data. Find it at policy.security.harvard.edu.

security.harvard.edu

Use supported software and hardware. It's good to use a phone or computer as long as you can, but when it no longer gets security updates, it's time to replace it.

security.harvard.edu

Use long, unique passwords for every account. Have too many accounts? Use LastPass for free. It can create and remember them for you!

security.harvard.edu

Enable two step verification to protect your data, even if your password is stolen. Find documentation for this feature at twofactorauth.org.

security.harvard.edu

People are at the heart of any information security program. We deeply appreciate your actions, big and small, that help keep Harvard secure.
